Qualification Board

Inofficial Glossary of Software Architecture Terminology for Foundation Level

2022.1-EN-20230321

current state: draft

The international Software Architecture Qualification Board (iSAQB®) defines curricula on several levels for software architects. This project tries to define most of the terms used in the foundation level curriculum.

About this version

This glossary is a fork from the iSAQB® glossary and was specifically tailored for the Foundation Level courses by Markus Harrer.

This community-driven project is not officially maintained project by the iSAQB® and you if you choose to use the content of this repository and the glossary, you are doing this at your own risk!
